Forecast for Tuesday 25 Jun 2024

Weather: Areas of low cloud shrouding the peaks at first, giving some mist or fog patches and moderate or poor visibility. This soon clearing above the hill tops to leave a dry day with plenty of sunny spells. Winds light throughout.

Chance of cloud-free hill tops above 600m: 40% at first, becoming 100% during the morning then 80% by late evening.

Low cloud and visibility: Areas of low cloud at first, with cloud bases of 200m to 400m, giving poor or very poor visibility. Clouds lifting above the summits quickly after dawn then very good visibility for the rest of the day. Perhaps some low cloud returning by late evening.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Early hill fog may lead to some tricky navigation at first. Very high UV index and high temperatures are expected, so adequate water and sun protection is recommended.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Wednesday 26 Jun 2024

Weather: Any overnight low cloud will soon clear to leave another very warm day, with plenty of strong sunshine. An isolated afternoon heavy shower is possible, perhaps more likely in the west.

Maximum wind: Southwesterly 5-10mph, gusting 15mph, perhaps 25-30mph in any heavy showers.

Chance of cloud-free hill tops above 600m: 60% at first, then 100% by mid-morning.

Low cloud and visibility: Areas of low cloud at first, with cloud bases of 200m to 400m, giving poor or very poor visibility. Clouds lifting above the summits quickly after dawn then very good visibility for the rest of the day. If an afternoon heavy shower develops, visibility could suddenly drop to poor.

Temperature: **Valleys:** Plus 14 Celsius, rising to plus 27 Celsius.
At 600m: Plus 13 Celsius, rising to plus 19 Celsius.
Freezing level: Above the summits.
